

INDICATORS OF THE GLOBAL REPORTING INITIATIVE REGARDING SUSTAINABLE DEVELOPMENT

Author **Leontina Bețianu**

N/A

Abstract:

Ample debates took place and numerous methods were elaborated in order to assess the environment performance of an entity. The simplest and fastest method consists in applying environment indicators which can present the multitude of environment data in a much clearer format. Environment indicators play an important role in decision making and this is why numerous organisms and institutions are interested in their development. This article presents the activities of GRI with regard to this issue.
