

MANUFACTURING AND DISTRIBUTION OF MILK PRODUCTS - THEIR ROLE IN INDUSTRY

Author **Barbu (Pana) Larisa-Florentina**

N/A

Abstract:

The substructure of producing the dairy products is developed and there is a sufficient capacity in covering the demand of these products. The reorganization by integration at the level of fabricating the milk will include the crossed obtaining of actions, which consists in the fact that the milk manufacturing companies hold the actions of another company or in the acquisition of the bankrupt companies.
