Abstract:

Tensed and leaped evolution of economy, known as the model stop and go, hampers the implementation of reforms, especially due to the appearance and persistence of perverse circles. Perverse circles suggest that the negative phenomena have the capacity to stimulate each other and that - which makes implementation of reform policies difficult - action on development negative phenomenon born off-side effects that damage the development of others. The following will be said some of those perverse circles.

Keywords: *inflation, model stop and go, reform policies*
