

DEVELOPMENT OF LOGISTICS CENTRES IN POLAND

Author **Beata Skowron-Grabowska**

N/A

Abstract:

resent economy requires creating special new points, which allow optimal cooperation of all market participants. These points are created under the name of logistics centers. Development of logistics centers is strictly connected with development of new technologies. There are several methods of location of logistics centers. Creation of logistics centres in Poland results from both business strategies and global strategy of the country.

Keywords: logistics centre, transport, storage, location
