Abstract:

The purpose of the paper is to determine the extent, to which environmental issues are taken into account in local spatial development plans in Poland and to what extent their approach can be linked to the concept of integrated development planning. The paper analyzes the content of local spatial policy tools - local spatial development plans in the scope related to environmental conditions. The extent to which the provisions (mutually diverse) constitute elements that can be associated with integrated development planning, was determined.

Keywords: environment, integrated planning, spatial policy
